NG PLAYER

Evolution begins with training individualization.

At TNGS, we love helping each athlete reach their full potential. Our training programme is designed with your age, progress and skill level in mind. We'll help you set personal goals and work at your own pace, so **you can achieve success and feel proud of what you can do!**

NG PLAYER

Competence Model

The Competence Model for Athletes, developed by TNGS and the Polytechnic University of Valencia, **makes it easier to assess, evaluate and improve.**

It's based on a study of more than 140 players from European clubs. By comparing your competences with other players of our database, within the same category, we design your training plan.

Goal Settings

We'll set short, medium and long-term objectives, and **will help you achieve them by working hard and getting to know you.**

First, we'll look at what you can do as a player and what you need to work on. Then, together with your coach, you'll decide what you want to achieve this season. Once that's done, the coach gives you a set of weekly tasks to complete in order to reach those goals.
